E-Dictate Launches **SecureWeb™**- An Online Transcription and Document Management Solution

Palatine, IL - May 5 2007 -- Clinicians are always looking for ways to improve medical documentation and increase productivity. E-Dictate's **SecureWeb™** is a transcription and document management solution that just does that. It is an upgrade that will completely transform the way providers and Practice Managers manage dictations and documents. **SecureWeb™** transcription and document management solution was developed by E-Dictate software team with the help of feedback from customers. It is an end-to-end solution that is secure, completely web-based and requires no software purchase or investment.

SecureWeb™ - Home Page

Welcome E-Dictate Clinic System (Premium Account)

Transcription
The link allows clinicians to perform search function on dictations using various criteria such as **Date of Birth, Patient Name**, etc. Search criteria are customizable.

Admin Access
This is the link for a practice Administrator. Think of it as a console that an Administrator or Office Manager can use to set up users with different permission levels, assign doctors to users

Customer Care
The link offers best customer care, resolution of issues, 24 x 7 communication, etc. Specific features are: CIMS, CRPS, Software, Help Guides.

Approve Reports
The link allows clinicians to Upload reports that are approved or digitally signed. There is a default location of **Approved Reports** on your PC.

Settings
The link allows clinicians to change the look and feel of search results. Click to use and customize various attributes like column or fields

Transaction Logs
Transaction Logs are your best tools to audit transactions such as transfer of audio files, retrieval of reports, faxes sent, etc.

Voice Files
Use this link to **Upload (Send)** voice files (dictations) to E-Dictate. There is a default location of voice files if you use Olympus recorder.

Demographics
Use this link to **Upload** or send patient demographics to E-Dictate.

SecureWeb™ improves overall workflow process and quality of medical record management, increases productivity and deliver savings that are hard to ignore. **SecureWeb™** solution includes features such as:

- Ability to View, Edit and Sign reports online
- Ability to listen to dictations online - while reading a transcript
- Ability to check status of reports online (Live), and change TAT by communicating with Transcription Manager
- Enhanced Search options that allow users to search reports by Patient Name, Medical Record Number, Range of Dates, etc.
- Ability to send faxes to Referring Physicians - with a click
- Online Contact management system

In addition to various transcription and document management features, [SecureWeb™](#) provides an interface for clinicians to communicate securely with our Customer Support Specialists. Secure online communication not only reinforces E-Dictate's commitment to HIPAA at all times, but also provides an effective 24 x 7 x 365 days support for its valued customers nationwide. Since [SecureWeb™](#) is completely web-based, training time and installation is a breeze for users. As long as a user has basic PC skills, broadband Internet access and familiarity with Internet browser, the functionality and features of [SecureWeb™](#) are a click away. It is a true plug-and-play system that works on most Windows-based PCs.

"We believe [SecureWeb™](#) feature-richness and value is unparalleled in document management" said E-Dictate CEO Djjotam Raina. "We have always listened to customers to design new software solutions and upgrades. But this one is really unique and makes our solution a winner for **Small Practices, Multiple Location Group Practices and Hospitals**".

"We wanted to build a solution that is easy-to-use, scalable and does not conflict with existing technologies and systems in-use at healthcare facilities," says Sanjay Kaul, Vice President of Marketing and Business Development at E-Dictate. "With [SecureWeb™](#) our customers finally have a solution that addresses needs of busy and cost conscious practices and provides a one-stop portal for complete clinical documentation".

For all our customers, [ESS Plus™](#) software will continue to be available as a desktop application to send and receive dictations. The choice to use [SecureWeb™](#) will rest with our customers.

[SecureWeb™](#) is available for immediate installation. For more information, contact a local E-Dictate representative or dial [1-847-686-0039](tel:1-847-686-0039) for sales assistance.
